Congratulations on the purchase of your new MAXflex MA/MA-F KVM Extender. You have bought a high quality extender. These instructions are part of this product. They contain important information regarding safety, use and disposal for every user of the MAXflex MA and MA-F KVM Extender. Please familiarise yourself with the information within prior to using your product. Use the product only in the manner as described and for the areas of application as stated. When passing the product to a third party be sure to also supply all instructions and other relevant documentation. Following proper use and maintenance, your MAXflex MA/MA-F KVM Extender will bring you joy for many years to come.

### **1.1 INTENDED USE**

This product is intended to be used as a device to increase the distance that a keyboard, monitor and mouse can be placed from a computer. This product is intended for professional use. The product should not be used in potentially explosive environments.

The product may only be used according to the instructions as described in this manual. All use, other than that described in this manual, is seen as unintended use. Modifications in the course of technological progress are reserved. In these user instructions the MAXflex MA/MA-F KVM Extender is referred to as 'product' or 'extender'. The MA/PC is referred to as the 'local unit' (CPU) and the MA/Monitor is referred to as the 'remote unit' (CON).

## **1.2 SAFETY INSTRUCTIONS**

### WARNING! Read and understand all safety instructions.

Follow all the instructions. This will avoid accidents, fire, explosions, electric shocks or other hazards that may result in damage to property and/or severe or fatal injuries. Please ensure that everyone who uses the product has read and followed these warnings and instructions.

- Keep all safety information and instructions for future reference and pass them on to subsequent users of the product.
- The manufacturer is not liable for cases of material damage or personal injury caused by incorrect handling or non-compliance with the safety instructions. In such cases, the warranty will be voided.
- This product is not intended for use by persons (including children) with restricted physical, sensory or intellectual capability or lack of experience and/or knowledge, unless they are supervised by a person who is responsible for their safety or provides them with instructions on how to use the product.

**DANGER!** Not for use in potentially explosive environments.

**DANGER!** Be vigilant at all times, and always take care around this product. Do not use electrical equipment if you are lacking in concentration or awareness, or are under the influence of drugs, alcohol or medication. Even a moment of inattentiveness can lead to serious accidents and injuries when using electrical equipment. Check the product and the cables for any damage before use. If there is any visible damage, a strong odour, or excessive overheating of components unplug all the connections immediately and stop using the product.

**DANGER!** The MX-F KVM Extender is a Class 1 Laser Product 1 according to DIN 40008/EN and VDE 0837.

If the product is not installed and used in accordance with this manual, it may cause disruptive interference with radio or television reception or affect other electronic products in residential areas.

- Use shielded cables only to connect the components in order to avoid such interference. Non-compliance invalidates the permission to operate this product.
- Only the mains adapter included with the product should be used as the power supply. Do not use other adapters.
- Prior to connecting to the mains, make sure your local mains voltage matches the rating indicated on the product.
- The product must be connected to a permanent and earthed AC wall socket.

- Protect cables from being strained, pinched or buckled and place them in a way to prevent people from tripping over the cord.
- In particular, ensure to avoid damage to the mains adapter.
- Use the product with a suitable, properly installed and easily accessible mains power socket. Make sure the product can be disconnected from the power socket at all times. Unplug the product during electrical storms or when not in use.

**DANGER!** Never touch the adapter with wet hands.

Use the product within the specified performance limits.

Keep the product away from flammable materials such as curtains and drapes.

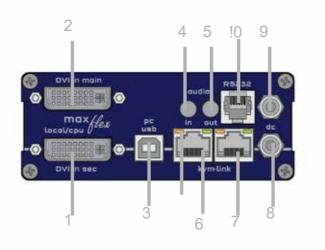

- Protect the mains adapter from use by third parties (particularly children). Keep the unused mains adapter in a dry, elevated or locked location away from children.
- Do not place the product near heaters.
- Do not drop or hit the product.
- Unplug all connections before cleaning the product. Do not use wipes or chemicals as these could damage the surface. Wipe the housing with a damp cloth. Electrical/ electronic parts must not be cleaned.
- Alterations to the product and technical modifications are not permitted.

## **1.3 TECHNICAL SPECIFICATIONS**

Type: Model:	KVM Extender (local unit and remote unit) MAXflex MA and MAXflex Fiber MA-F KVM Extender
Power supply input voltage: Power supply output:	100 - 240 V; 50/60 Hz AC 12V; 1A (external power supply)
Power requirement:	6W per extender (excluding attached USB devices)
Operating temperature range:	0 °C to 45 °C / 32 °F to 113 °F
Storage temperature range:	–25 °C to 80  °C / –13 °F to 176 °F
Relative humidity:	max. 80% (non-condensing)
Storage humidity:	max. 80% (non-condensing)
Casing Material:	Anodized aluminium
Dimensions:	approx. 109 x 43 x 107,5 mm / 4.29 x 1.69 x 4.23 inch
Weight:	local unit 1005g/ 2,21 LB remote 890g/4.17 lb
Expected product life:	82 820 hours / 9.5 years

### 2.1 UNPACKING AND CHECKING THE CONTENTS

Before using the product for the first time it should be checked for damage. In case of damage due to transport inform the carrier immediately. Before delivery the product is checked for its function and its operating safety.

Make sure that the packaging contains the following content:

### MAXflex single copper Delivery content - Local (CPU)

1 x MA local (CPU) 1 x wall power supply unit l 12V 1A (EU-plug or INT. plug) 1 x DVI - DVI cable 1,8m (5.9ft) 1 x USB cable 1,8m (5.9ft) 4 x rubber feet

### **Delivery Content - Remote (CON)**

1 x MA remote (CON) 1 x wall power supply unit I 12V 1A (EU-plug or INT. plug) 4 x rubber feet

### **MAXflex dual copper**

### **Delivery Content - Local (CPU)**

1 x MA2 local (CPU) 1 x wall power supply unit l 12V 1A (EU-plug or INT. plug) 2 x DVI - DVI cable 1, 8m/5.9ft 1 x USB cable 1, 8m/5.9ft 4 x rubber feet

### **Delivery Content - Remote (CON)**

1 x MA2 remote (CON) 1 x wall power supply unit l 12V 1A (EU-plug or INT. plug) 4 x rubber feet

### Make sure that the packaging contains the following content:

### **MAXflex single Fiber**

### **Delivery Content - Local (CPU)**

1 x MA1-F local (CPU) 1 x wall power supply unit l 12V 1A (EU-plug or INT. plug) 1 x DVI - DVI cable 1, 8m/5.9ft 1 x USB cable 1, 8m/5.9 ft. 2 x SFP Module-Multimode up to 500m/1640ft alternativ with Single-Mode up to 20km/12mi (item no 6855) 4 x rubber feet

### **Delivery Content - Remote (CON)**

1 x MA-F remote (CON) 1 x wall power supply unit l 12V 1A (EU-plug or INT. plug) 2 x SFP Module Multimode up to 500m/1640 ft. alternativ with Single-Mode upt to 20km)/12mi 4 x rubber feet

### **MAXflex dual Fiber**

### **Delivery Content - Local (CPU)**

1 x MA2- F local (CPU) 1 x wall power supply unit l 12V 1A (EU-plug or INT. plug) 2 x DVI - DVI cable 1, 8m/5.9ft 1 x USB cable 1, 8m/5.9 ft. 2 x SFP Module-Multimode up to 500m/1640ft alternativ with Single-Mode up to 20km/12mi (Item 6855) 4 x rubber feet

### **Delivery Content - Remote (CON)**

1 x MA2-F remote (CON) 1 x wall power supply unit l 12V 1A (EU-plug or INT. plug) 2 x SFP Module Multimode up to 500m/1640 ft. alternativ with Single-Mode upt to 20km)/12mi 4 x rubber feet

## **2.2 MOUNTING OPTIONS**

### 2.2.1 MOUNTING PADS AND RUBBER FEET

The mounting pads and rubber feet can be used to hold the extenders in place and prevents them from sliding and falling.

### To attach the mounting pads or rubber feet:

- 1. Remove the protection layer from the **mounting pads** or **rubber feet** (G).
- 2. Attach the mounting pads or rubber feet (G) to the bottom the units.

### 2.2.2 MOUNTING KITS (OPTIONAL)

### The following mounting kits are available:

Rackmounting kit RMK-FLEX-F Part Nr. KT - 6232 RMK-FLEX-F Rack mounting kit RMK-F for mounting FLEXline Extender. 4 Single or Dual Extender. It consists of a19" rack shelf and an alu-faceplate.

Rackmountingkit RMK- FLEX- FN - T Part-Nr. KT - 6232 RMK- FLEX-FN Rack mounting kit RMK-F for mounting FLEXline Extender. 4 Single or Dual Extender. It consists of a19" rack shelf and an alu-faceplate and a power supply

Under table mounting kit Part Nr KT - 6231 UMK-FLEX The Under Desk Mounting kit is for underdesk mounting of FLEXline Extender.

Din rail MountingPart-Nr. KT - 6235 DINMK-FLEXThe DIN rail mounting is used for space-saving installation in control cabinets or on DIN rails.The attachment to the MA extenders is possible in several ways.

#### Vesa Mounting

#### Part-Nr. KT - 6236 VH-FLEX

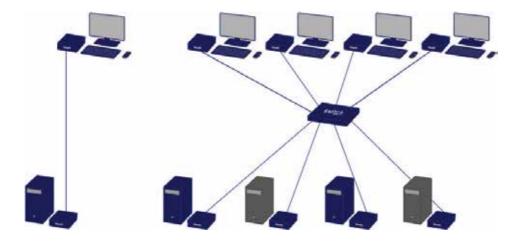

The robust VESA mounting is used to attach an extender to a monitor with existing VESA mounting points. The Extender becomes one unit with the monitor and saves a lot of space and cable clutter. The VESA mounting kit can be combined with an existing monitor mounting.

## **2.3 INSTALLING THE EXTENDER**

**WARNING!** Read and understand all safety information before installing the product.

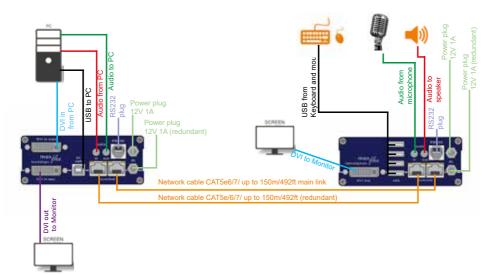

The units can be set up to access one host computer, or to access numerous host computers. In the case of the latter, an additional Network Switch must be installed. With a Network Switch, each user can gain quick access to any of the required computers.

### point to point connection & Matrix Switching System

### 2.4 QUICK INSTALLATION MAXFLEX SINGLE

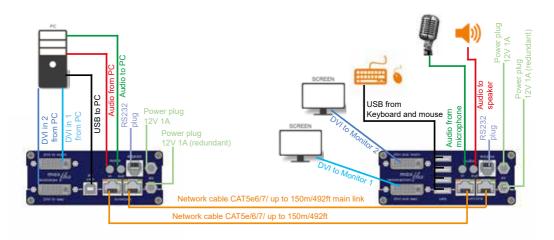

local / CPU – remote / CON

- 1. Connect the CON / Remote and the CPU / Local Unit to the included 12V 1A power supply.
- 2. Now connect the USB cable to a USB port on your PC and connect the other end of the USB cable to the CPU / Local Unit. Connect keyboard and mouse to the CON / Remote Unit.
- 3. Connect the CPU / Local and the CON / Remote Unit with a network cable.
- 4. Now connect the DVI cable to the DVI socket of the PC and the other end to the DVI socket of the CPU / Local Unit (PC-in).
- 5. Almost done! Connect the audio cable local audio/out to the PC audio/in and remote audio/out with audio cable to the microphone
- 6. Using a switch: Connect all endpoints to the switch. Ensure that all connections have a bandwith of 1Gbit/sec. For video sharing the network has to support IGMP snooping.

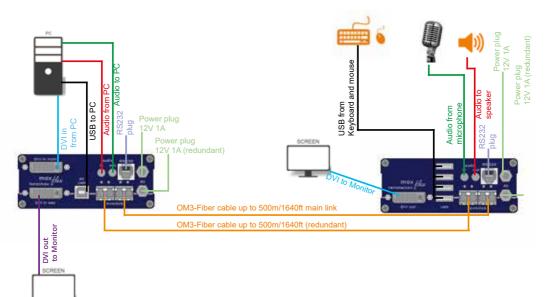

### **2.5 QUICK INSTALLATION MAXFLEX DUAL**

local / CPU - remote / CON

- 1. Connect the CON / Remote and the CPU / Local Unit to the included 12V 1A power supply.
- 2. Now connect the USB cable to a USB port on your PC and connect the other end of the USB cable to the CPU / Local Unit. Connect keyboard and mouse to the CON / Remote Unit.
- 3. Connect the CPU / Local and the CON / Remote Unit with a network cable.
- 4. Now connect the DVI cable to the DVI socket of the PC and the other end to the DVI socket of the CPU / Local Unit (PC-in).
- 5. Now connect the DVI cable to the DVI socket of the PC and the other end to the DVI socket of the CPU / Local Unit (PC-in 2). Then connect the monitor with the DVI cable to the CON / Remote Unit.
- 6. Connect PC audio/out with the audio cable to local audio/in. Connect audio/out via the audio cable
- 7. Almost done! Connect the audio cable local audio/out to the PC Audio in and remote audio/out with audio cable to the microphone
- 8. Using a switch: Connect all endpoints to the switch. Ensure that all connections have a bandwith of 1Gbit/sec. For video sharing the network has to support IGMP snooping.

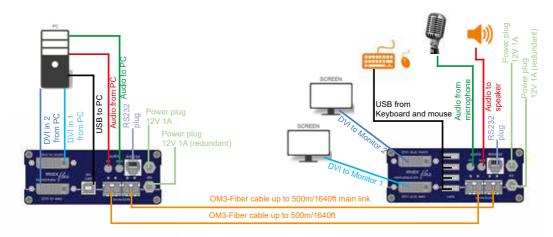

### 2.6 QUICK INSTALLATION MAXFLEX SINGLE FIBER local / CPU – remote / CON

- 1. Connect the CON / Remote and the CPU / Local Unit to the included 12V 1A power supply.
- 2. Now connect the USB cable to a USB port on your PC and connect the other end of the USB cable to the CPU / Local Unit. Connect keyboard and mouse to the CON / Remote Unit.
- 3. Connect the CPU / Local and the CON / Remote Unit with a network cable.
- 4. Now connect the DVI cable to the DVI socket of the PC and the other end to the DVI socket of the CPU / Local Unit (PC-in).
- 5. Connect PC audio/out with the audio cable to local audio/in. Connect audio/out via the audio cable.
- 6. Almost done! Connect the audio cable local audio/out to the PC audio/in and remote audio/out with audio cable to the microphone
- 7. Using a switch: Connect all endpoints to the switch. Ensure that all connections have a bandwith of 1 Gbit/sec. For video sharing the network has to support IGMP snooping.

## 2.7 QUICK INSTALLATION MAXFLEX DUAL FIBER

local / CPU – remote / CON

- 1. Connect the CON / Remote and the CPU / Local Unit to the included 12V 1A power supply.
- 2. Now connect the USB cable to a USB port on your PC and connect the other end of the USB cable to the CPU / Local Unit. Connect keyboard and mouse to the CON / Remote Unit.
- 3. Connect the CPU / Local and the CON / Remote Unit with a network cable.
- 4. Now connect the DVI cable to the DVI socket of the PC and the other end to the DVI socket of the CPU / Local Unit (PC-in).
- 5. Now connect the DVI cable to the DVI socket of the PC and the other end to the DVI socket of the CPU / Local Unit (PC-in 2). Then connect the monitor with the DVI cable to the CON / Remote Unit.
- 6. Connect PC audio/out with the audio cable to local audio/in. Connect audio/ out via the audio cable
- 7. Almost done! Connect the audio cable local audio/out to the PC audio/in and remote audio/out with audio cable to the microphone
- 8. Using a switch: Connect all endpoints to the switch. Ensure that all connections have a bandwith of 1Gbit/sec. For video sharing the network has to support IGMP snooping.

### 2.8 START UP

#### To start up the system without switch:

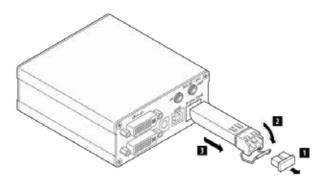

- 1. Make sure that the two monitors and the computer are switched on.
- 2. If you are using a Network Switch, connect the power supply to an earthed wall socket.
- 3. Connect both extender **power supplies** (C) to an earthed wall socket. Both extenders will start an initialisation process. The red status LED blinks a few seconds. After a few seconds the status LED lights green. The monitor will displays your computer's desktop or any open applications.

### **2.9 REPLACING THE SFP MODULE**

The MA1-F is delivered with a multimode SFP module.

#### To replace an SFP module with a different SFP module:

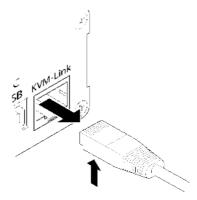

- 1. Remove the black dust protector from the SFP module.
- 2. Pull the metal latch of the SFP module forwards until it is at a right angle.
- 3. Replace the SFP module with the other module. Put the metal latch back in position. Only use SFP modules from kvm-tec, or recommended by kvm-tec.

### 2.10 REMOVING A CATX CABLE

### To remove a CATx cable:

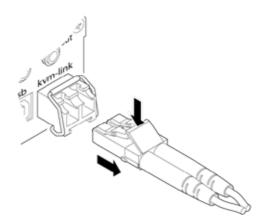

• Press the latch down and slowly pull the cable out.

### 2.11 REMOVING A FIBER CABLE

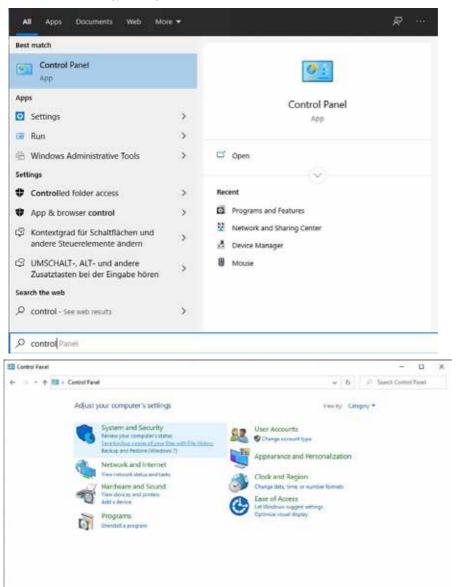

#### To remove a fiber cable:

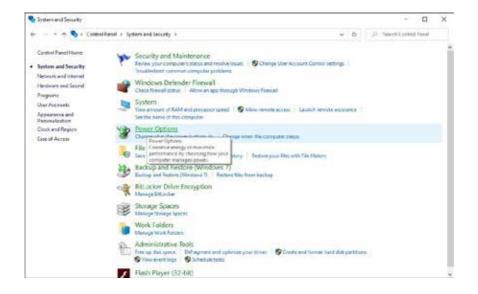

• Press the latch down and slowly pull the cable out.

## **3. EXTENDER SETTINGS**

### **3.2 SYSTEM STATUS**

Dual

In the status overview menu the current status of the extender connection is displayed. It provides information on the connection itself as well as resolution of the video channel, and USB-status.

The enabled options and the current firmware-version is displayed in the left top corner. Link status shows whether there is a physical connection available. **Connected** indicates if kvm data is currently able to be transmitted.

Video and USB show if data is currently being transmitted.

## **3. EXTENDER SETTINGS**

### **3.2 FIRMWARE VERSION DISPLAY**

Make sure that the main menu is open. Under "A" - About the currently installed firmware version of the remote (CON) and local (CPU) extender is displayed (e.g. ,4267').

### **3.3 FEATURES MENU**

Press the F key to enter the Features menu.

### **3.4.2 MATRIX SWITCHING MODE**

By pressing the "M" button you can switch the Matrix Switching Mode off and on

### **3.4.3 USB SAVE FEATURE**

The kvm-tec feature "USB save" prevents the intrusion of viruses via the USB interface by deactivating mass storage devices.

By pressing the key "S" you can switch the USB save feature on and off

### 3.4.4 DISPLAY THE LAST RECEIVED IMAGE "FREEZE LAST IMAGE"

With the " freeze the last image" function, the last image received can be displayed instead of a black screen when the remote extender (CON) is disconnected from the local extender (CPU). To show that it is the last image received, the frame of the image will blink red. To enable or disable the "Freeze last image " function: 1. from the Extender Settings menu,

press the **F** button. The Feature Settings menu is displayed.

- Press the **D** button to enable or disable the function.
- Press **ESC** to return to the main menu.
- Press I to enable or disable the function.
- Press **ESC** to return to the main menu

## 3.6.2 USB COMPATIBILITY MODE

Some PC's require a USB FullSpeed (USB 1.1) connection at startup. Our extenders are detected as USB HUB's - this may cause some PC's to abort the boot process. This can be avoided with the USB Compatibility Mode.

The USB compatibility mode can be enabled or disable . To enable / disable the USB compatibility mode

1. From the Extender Settings menu, press the L key: The LOCAL SETTINGS menu appears

2. Press the U key to enable or disable the USB compatibility mode

Local Settings - DUW.

	Use ( +/- ) for value change or ( u/d ) for value change

### **3.6.6 VGA PARAMETERS**

The VGA settings can be adjusted and optimized. Optimize the VGA settings:

1. press the **L** button in the Extender Settings menu. The Local Settings menu is displayed. Press the **V.** The VGA menu will be displayed

- Pressing F1 moves the display range upwards.
- Pressing **F4** moves the display range down.
- Pressing F2 moves the display range to the left.
- Pressing **F3** moves the display area to the right.
- Pressing F5 reduces the image (zoom out).
- Pressing F6 enlarges the image (zoom in).
- Pressing the space bar changes the speed of the above mentioned settings. The speed can be switched between 1 and 10.
- Pressing M switches the video mode between the following modes:
- Auto the mode is automatically detected and set by the Extender.
- DVI only the DVI input is recognized.
- VGA only the VGA input is recognized
- Press K to automatically adjust and position the screen area.
- Press I to reset the parameters to the default values.
- Press S to save the settings and exit the menu.
- Press Q to exit without saving.

### 3.7.4 SETTING A BAUD RATE FOR YOUR RS232 CONNECTION

#### Setting the baud rate with activated RS232 upgrade

- 1. In the extender settings menu, press the **R** button. The Remote Settings Menu is displayed.
- 2. Press the **R** button. 2. The Baud Rate menu is displayed.
- 3. To select a baud rate, press the **corresponding key**.
- 4. The Enter Parity menu opens.
- 5. Press the **appropriate button** to select a parity

### **RS232 CONNECTOR PINNING**

Local Unit (CPU) Pinout (DCE):			Remote Unit (CON)Pinout (DTE):		
Pin	Function	direction	Pin	Function	direction
2	TxD	OUT	2	RxD	IN
3	RxD	IN	3	TxD	OUT
4	DTR	IN	4	DTR	OUT
5	GND	_	5	GND	_
8	CTS	OUT	8	CTS	IN

The pin numbers refer to a 9-pin D-sub plug.

The baud rate can be set in the menu. There is a universal setting for baud rates up to 9600 which transmits all different RS232 configurations transparently. For higher baud rates the following settings are available.

#### possible baudrate

#### possible Parity

No
Odd
Even
Mark
Space

#### possible Stopbits

In this view, all extenders for which a firmware update is to be performed are displayed. This function displays a list of the extenders that are assigned to the Switching Manager. Updating the extenders in the system is a two-step process. In the first step the firmware is loaded into the device and in the second step the update is performed. All extenders in the system file can also be updated together.

For the update, activate the Settings window and select the folder from which the firmware file is to be uploaded. The list of bitmaps is displayed under MX Firmware.

Then transfer the firmware and the update will be done in two steps.

1. send the firmware to the extender.

It takes about 2 minutes until the firmware is loaded into the extender. The bar on the right in the column

the main window fills blue

2. is the update.

**ATTENTION** Only if the bar is grey, the update is finished.

### **3.8.2 FIRMWARE UPDATE WITH USB STICK**

For the update with an USB stick the follwoing steps are necessary

USB UPDATE	
(S)tatus (F)eatures (D)DC/EDID (L)ocal Settings (R)emote Settings (W)pdate (A)bout	Please prepare your USB stick for updating: 1 Ensure your USB stick is formatted with the FAT-32 filesystem. 2 Conv update file (.bin) to the USB stick. Make sure to put it in the main directory of the stick (not in any folders); 3 If you haven't already, insert stick in to extender. Please Wait

- 1. you receive the message that you can plug in the USB stick.
- 2. copy the update file (ending in .kvm) to the USB stick
- 3. make sure that the update file is directly on the stick and that it is not in any subdirectory
- 4. the USB stick must be formatted with FAT-32

### 4. NETWORK SETTINGS AND MANAGEMENT SWITCHING SYS-TEMS

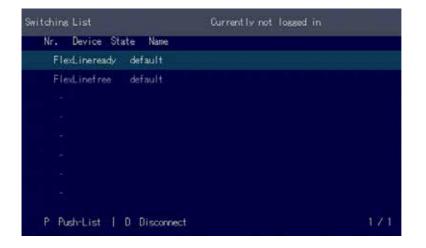

All network settings, user administration and extender management are done via the included Switching Manager software and all functions are described in the Switching Manager 2000 manual. You can download the manual from our website. www. kvm-tec.com

### **4.1 DISPLAY SWITCHING LIST**

Available devices that the user can connect to are displayed here.

#### Create shortcut:

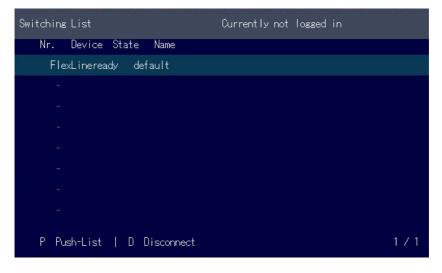

You can create a shortcut with the following key combination "Strg+Alt+Print"

### 4.2 PUSH / GET LIST

Display of all extenders that can be shared. The current image of the workstation can be shared with other remote units via this list

Switching List	Currently not lossed in	
Nr. Device State	Name	
FlexLineready defi	ault	
G Get-List   D Di	sconnect	1. 2.1

### **4.3 FAVORITE LIST**

A total of 8 favourites can be defined. The connection of these 8 favourites is possible with shortcuts from 1-8

Switching List	Currently not lossed in
Nr. Device State Name	
FlexLineready default	
FlexLinefree default	
P Push-List   D Disconnect	171

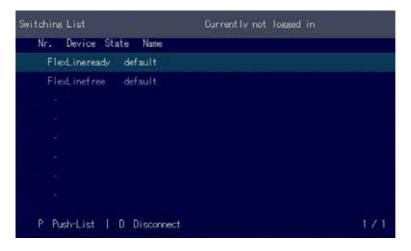

## 4.4 CONNECTING, DISCONNECTING OR SELECTING A CURRENT WORKPLACE CONNECTED DEVICES

Logging in to the local PC in the main menu, press **A**. Enter your username and password. Disconnecting from an encoder in the main menu, press **D**. Enabling a direct connection If you are not connected through a network switch, you can connect directly to an encoder with point-to-point mode. In the main menu, press **P**. After logging in the user receives his personalized lists (Devices

In the main menu, press **P**. After logging in, the user receives his personalized lists (Devices, Favorites List).

## **4.5 SEARCHBOX-FUNCTION**

In the list view you can search for the different extenders

In the list view you can see all available extenders. To search for specific Extenders, you must press the "TAB" key. Now you can enter a string to search for the Extender you want to see. Press the Return key, you should now see a reduced list of Extenders.

## **4. NETWORK SETTINGS**

#### **4.6 IP MANAGEMENT**

The KVM extenders from kvm-tec support three different addressing methods. The IP Management menu is only accessible in the active "Matrix Switching Mode" under Features.

Features	Features		
	H Matrix Switching     D Freeze last image     E USB Emulation Mod     S USB Save Feature     O Power Redundancy     L Link Redundancy A     C Diagnosis     U Unlock Feature     I IP Management	e (Mass Storage / Webcam disabled) Alert	

### Default

In default mode, each Extender generates an IP address using the ID number to avoid number collisions in the network.

	IP Management		
	(S)tatus	Current Setting Default	
	(F)eatures (D)DC/EDID (L)ocal Settings (R)emote Settings	1 Defention	
		A Default	
		B DHCP	
		C Static IP	
(V)pdate (A)bout		169.254.135.216	
		169.254.135.217	
		169.254.56.86	
		169.254.56.87	
	Save/send Settings		

# **4. NETWORK SETTINGS**

#### DHCP

The KVM extenders from kvm-tec support the DHCP protocol (Dynamic Host Configuration Protocol). This allows the assignment of network addresses by a DHCP server.

IP Management	IP Management	
(S)tatus	Current Setting DHCP	
(F)eatures (D)DC/EDID	A Default	
(L)ocal Settings (R)emote Settings	B DHOP C Static IP	
(U)ødate	Main Link: 169.254.82.71 Bec Link: 169.254.168.226	
(A)bout	Partner Main Link: 169.254.56.86 Partner See Link: 169.254.56.87	

#### **Static IP**

In Static-IP mode the IP addresses can be assigned via the OSD. It is necessary to be connected to a local partner to be able to transmit IP addresses.

The blue values show the currently assigned IP addresses. With the arrow keys up / down you can overwrite the respective IP address. The addresses can be overwritten by entering a valid 12-digit number. E.g.: for the IP address 10.0.0.1 the 12-digit number 010.000.000.001 must be entered in the OSD. The separator points are added automatically.

### **4. NETWORK SETTINGS**

If all four IP addresses are overwritten, "Save/send settings" must be used to transmit the new values to the extenders.

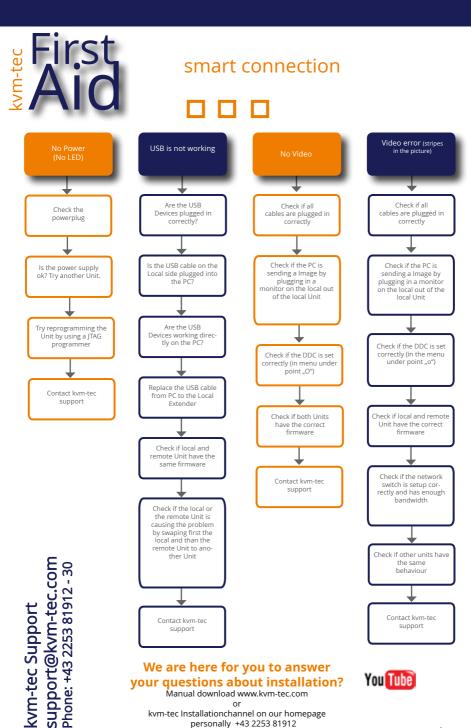

IP Management	IP Management		
(S)tatus (F)eatures (D)DC/EDID (L)ocal Settings (R)emote Settings (U)ødate (A)bout	Qurrent Setting Static IP A Default B DHCP C Static IP Main Link: 192.168.050.100 Sec Link: 192.168.050.101 Partner Main Link: 192.168.050.103 Partner Sec Link: 192.168.050.104 Save/send settings		

Static IP addresses can only be overwritten in Static IP mode.

#### **6. MAINTANCE AND CARE**

#### **6.1 EXTENDER CARE**

**Caution!** Do not use solvent-containing cleaners. Do not use wipes, alcohols (e.g. spiritus) or chemicals as these could damage the surface.

#### **6.2 DISPOSAL**

This symbol on the product, the accessories or packaging indicates that this product must not be treated as unsorted municipal waste, but must be collected separately! Dispose of the product via a collection point for the recycling of waste electrical and electronic equipment within the EU and in other European countries that operate separate collection systems for waste electrical and electronic equipment. By disposing of the product in the proper manner, you help to avoid possible hazards for the

environment and public health that could otherwise be caused by improper treatment of

waste equipment. The recycling of materials contributes to the conservation of natural resources.

Therefore do not dispose of your old electrical and electronic equipment with the unsorted municipal waste.

The packaging is made of environmentally friendly materials, which may be disposed through your local recycling facilities. By disposing of the packaging and packaging waste in the proper manner, you help to avoid possible hazards for the environment and public health.

# 7. WARRANTY

#### **7. WARRANTY**

### **7.1 STANDARD WARRANTY**

The warranty period is 24 months from the date of purchase. The warranty expires in case of:

- External effort
- improper maintenance
- Violation of the operating instructions
- lightning damage

Please, contact us first before returning the product.

#### **7.2 EXTENDED WARRANTY**

2 years standard warranty

Art Nr KT - 9003 warranty extension to 5 years per Set

Art Nr KT - 9002 warranty extension to 5 years per Unit

### 8.1 REQUIREMENTS FOR CAT5E/6/7 CABLES

A Cat5e/6/7 cable should meet the following requirements:

- The pins are connected 1:1. **Caution:** the cable pairs must be twisted to EIA/TIA- 568A (rare) or EIA/TIA-568 B (common) pairs.
- Erroneous assignments cannot be found with a simple cable tester.
- The pins for the green pair of wires are not adjacent to one other.
- The cable must at the very least meet the CAT5 specifications and be suitable for Gigabit transmission.
- The cable should meet one of the following standards: Class D ISO/IEC 11801:2002 or EN 50173-1:2002. Schema EIA/TIA-568 B.
- Only use shielded installation cable with min. cross section of 24 AWG throughout the length.
- The shield should be contiguous and connected to both ends. A shielded patch cable is allowed for connection to the device.

	Pin	Color
(	/ 1	Orange/White
	∽ 2	Orange
	/ 3	Green/White
$\left( \right)$	- 4	Blue
$\left( \right)$	<b>&gt;</b> 5	Blue/White
	<b>6</b>	Green
(	7	Brown/White
	<b>8</b>	Brown

#### Schema EIA/TIA-568 B

### **8.2 REQUIREMENTS FIBER CABLES**

### 8.2.1 MULTI-MODE (STANDARD)

A Multi-Mode fiber cable should meet the following requirements:

- Maximum length should be 500 m. The MA1-F includes a fiber Multimode SFP Module which allows a transmission distance of up to 500 m.
- Dedicated fiber connection cable type Duplex Multimode 50/125 $\mu$  (OM3), LC connector

### 8.2.2 SINGLE-MODE (OPTIONAL)

A fiber Single-Mode – SFP Module cable should meet the following requirements:

- Up to 20 km transmission distance.
- · Requires dedicated fiber connection: cable type Duplex Singlemode with LC connector

A fiber Single-Mode – SFP Module BiDi cable should meet the following requirements:

- Up to 20 km transmission distance.
- Requires dedicated fiber connection: cable type Singlemode with LC connector Wavelength (1) of 850 nm in multi-mode or 1310 nm TX -1550 nm RX in single-mode

### 9. REQUIREMENTS NETWORK-SWITCH

### 9. REQUIREMENTS NETWORK SWITCH

The entire switching network system requires its own separate network. For security reasons, it cannot be integrated into an existing corporate network.

The network switch must meet the following specifications:

1 Gigabit switch, with a port-to-port transfer rate of 1 Gigabit/second.

The following switches have all been tested and verified to work with all kvm-tec extenders.

#### **Network requirements Matrix System UDP Version**

The KVM-TEC Matrix Switching System communicates via IP

between the individual endpoints (local/CPU or remote/CON), as well as with the KVM-TEC Switching Manager, Gateway2Go and API. Sharing of videos is realized via the IGMP function of the switch via multicast.

Each endpoint joins a multicast group, even if only one connection is established. This process is repeated cyclically so that the switch keeps the multicast group active.

One exception is the Gateway2Go, which uses unicast and communicates via UDP just like the other devices.

#### The following UDP ports are required for the transmission:

Port Number 53248 (0xD000) to 53260 (0xD00C)

and Port Number 50000 (0xC350)

These ports must be taken into account when configuring the firewall. For the connection via WAN a secured VPN connection is necessary.

The KVM-TEC Matrix system supports DHCP management of IP addresses, static IP addresses are possible, internal default address range and assignment of IP addresses via a DHCP server. To meet all these requirements, the use of Layer 3 switches is recommended.

### **10. ADDRESS & PHONE / EMAILS**

If you have any questions about our products, please contact kvm-tec or your dealer.
